- React, Vue, Vuetify, HTML, CSS3, Javascript, TypeScript, jQuery, PHP, XML, JSON, Ajax, Bootstrap, API integration, npm, composer, Node, Express JS, Firebase, Webpack, Visual Studio Code, GreenSock, React, HTTP, MJML, PostgreSQL, MySQL, Tailwind CSS, JSX, Babel, Webpack, Postman, AWS, Docker

EXPERIENCE

Associate Front-End Engineer

[LifeMD](#)

February 2021 – May 2023

- Worked on a team composed of developers, devOps engineers, product managers, Q/A testers and reported to the Director Of Engineering. My responsibilities were to build features and reports on internal patient care applications.
- Automated HTML transactional email generation and maintenance which greatly improved the production and maintenance of branded emails.
- Improved speed of prescription handling by building a prescription PDF generator using PHP to take HTML and convert it to a downloadable PDF.
- Implemented cloud storage with our patient phone call recordings from Five9 and saved audio files to LifeMD's AWS S3 bucket.
- Improved call monitoring for management by creating a report that displays tables of patient call data including an audio player to listen to customer service rep phone calls.

Bootcamp Student

[LearningFuze](#)

July 2020 – February 2021

- Programmed 300+ hours in a simulated agile work environment for an accelerated web development program.

Front-End Web Developer

[Eagle Industrial Group](#)

March 2018 – July 2020

- Built three functional and visually appealing online stores in collaboration with various 3rd party contractors and the Director of Marketing.
- Developed an automated email marketing campaign that offered rack installation services to new customers which resulted in an additional 200-300 installation inquiries per month.
- Generated over 20 blog articles for the purpose of optimizing SEO of the garage storage division.
- Created back-end API endpoints from SQL databases to build a dynamic order-tracking system.
- Produced batch and automation scripts with Photoshop and Google Sheets to speed up production of

print advertisements.

PROJECTS

Job Getter - Track and send customized emails to individuals who are hiring at their respective companies.

- Full-stack web application used to track and contact employers [Nuxt 3 + MongoDB]
- [GitHub](#)

Chat RRG - Chat GPT clone

- Uses OpenAI API - I use this instead of a paid subscription to OpenAI because it saves money on development costs. [Next.js + MongoDB]
- [GitHub](#)

EDUCATION

Full-Stack Web Development Program,

[LEARNINGFUZE](#)

- Programmed 10-12 hours a day for 14 weeks (800+ hours) in a simulated Agile work environment

Bachelor of Science in *Visual Communication Design*, Electives taken in *Online Marketing*
